

### **BRANCHES ELIGIBLE-**

CSE,DD CSE,M&C,ECE and EE.

### **CGPA CRITERIA-**

8.5

### **SELECTION PROCESS-**

#### **ROUND 1- CODING ROUND**

Samsung R&D usually throws a tough coding question in the first round. You have to solve one problem in approximately 90 minutes. Unlike other companies like MS, Amazon and GS, Samsung takes its coding round on its own built platform (a Samsung Desktop Software). The question that was given was of moderate level.

#### **ROUND 2- GROUP DISCUSSION ROUND**

The second round was a GD cum Coding Interview round. A mathematical question based on Permutations and Combinations was given to a group of ten to twelve students and were asked to solve it individually. The second question required knowledge of Coding + ML/AI for which an algorithm had to be formulated within a limited time frame.

#### **ROUND 3- INTERVIEW ROUND**

A total of three rounds were taken, two technical interviews and one HR interview.
