SELECTION PROCESS-

ROUND 1- CODING ROUND

The first round included questions on Data Structures, in which the solutions had to be written down. There were three questions on coding (Data Structures/ Algorithms), with a series of Multiple-Choice Questions aiming to evaluate ability in Maths, Statistics and Probability. The questions covered topics like tree, priority queue etc. Candidates were supposed to give optimized solutions to the problems. It also included questions on projects in college and internship.

ROUND 2 - INTERVIEW ROUND

The second round had a single coding question including various concepts of Data Structures along with a discussion on the internship project and experience. The

interviewer for this round was a VP in the Compliance division.
